IDENTIFIERS *Colorado

ABSTRACT

This report presents a variety of statistical and financial data on Colorado's public schools, as required by the Colorado Revised Statutes (1963), Chapter 123-1-13(1). This volume is the 1975 edition of the report, which presents data up through the 1973-74 school year. Section 1 consists of tables that present all information required by the law, including data on revenues and expenditures for each school district and some additional data for each school in the district, including 1973-74 group achievement test results. Section 2 contains selected fiscal information for each school district for the 1973 through 1975 budget years. (JG)

Calvin M. Frazier, *Commissioner*

February 14, 1975

The Honorable Richard D. Lamm
Governor, State of Colorado
Members of the Colorado General Assembly
State Capitol
Denver, Colorado 80203

Dear Governor Lamm and Legislators:

This document is presented in compliance with Colorado Revised Statutes 123-1-13(1), as amended.

This year's Consolidated Report is changed considerably from those issued during the past few years. Because of a continued expansion of data contained in previous Consolidated Reports it became impossible to meet the time schedule specified in the statute. Thus, the current document includes only those data elements that are specifically cited in the statutes, along with selected fiscal information that may be useful during the current legislative session. It is our hope that making this information more timely will facilitate the legislature's educational information needs. Other timely publications that will be available within the next forty-five days will include:

- Public School Finance Act Impact Study
- Transportation Data for Colorado School Districts - 1973-74
- Revenues and Expenditures in Colorado School Districts - 1973-74
- Pupil Membership and Related Information - Fall 1974

Other 1975 publications will include:

- Salaries and Related Information - Certificated Personnel - Fall 1974
- Colorado School District Facility Data - 1974
- High School Graduation Requirements - 1974

The completion of the "Educational Data Needs Assessment" that is now being conducted in Colorado will aid us in the preparation of our publications during 1976. This assessment will help us to present to our clients data that will best serve their needs.

The Department of Education and the State Board of Education welcome your comments and suggestions on additional information which will add value to this report and to any of our future publications. A primary objective of our reports and publications is to assist individuals in making educational decisions that in turn will benefit Colorado's children.

Sincerely,

Calvin M. Frazier

Calvin M. Frazier
Commissioner of Education

SECTION I 1

SECTION II 163

INTRODUCTION

The Colorado Constitution provides for the establishment of a free public school system and for a State Board of Education to furnish general supervision for that system.

Under the direction of the State Board of Education, the Colorado Department of Education seeks to encourage and assist Colorado educators and citizens in improving the quality of education and in achieving equality of educational opportunities. To accomplish these objectives, the Colorado State Board of Education and the Colorado Department of Education staff strive to bring leadership and service to all areas of the state's educational program.

This Consolidated Report is designed to present selected facts about Colorado public schools. The Report contains all items required by Chapter 123-1-13(1), Colorado Revised Statutes, 1963, in addition to selected fiscal information.

Although the information presented here provides one way of looking at school districts, there are limitations in the conclusions which can be drawn from this material, both because of the impossibility of assuring comparability and because of the emphasis on the elements which make up a district rather than the educational process itself.

The reported data do not indicate the effectiveness of a school district's program, nor can generalizations be made about all districts from this publication. The information reported here is not intended to supply the necessary criteria for making judgments about the educational process. Persons interested in determining the effectiveness of education within a district must utilize much more specific kinds of information from many sources.

Section I contains all statutory requirements, and Section II contains selected fiscal information covering a three year period from 1973 through 1975 budget years.

Those interested in additional information about this document or about education in Colorado may contact the Department of Education.

DEFINITIONS

SECTION I

County: The county in which the administration offices of the district are located.

District: Legal and common names of the district.

School: Names of all schools in the district, beginning with elementary schools and continuing through junior high schools and senior high schools.

Number of Schools: The total number of units (elementary, junior and senior high) operated by the district. Source: Information Sheets for the Colorado Education Directory, Form CDE 98.

Total Revenues; Total Expenditures: Total district revenues and total district expenditures for the 1973-74 school year include three funds: general fund, capital reserve fund, and the bond redemption fund. Source: School District Semi-Annual Financial Report, CDE Form 3.

Classroom Teacher Turnover Rate: The rate, expressed as a percent, at which personnel whose primary function is classroom teaching leave or separate from the district during the school year. Source: This rate is determined by comparing Certificated Personnel, CP-1 Forms sent to the Colorado Department of Education in the fall, against those sent the previous fall.

Annual Dropout Rate (%): This is the percentage of the student body which dropped out of school during the 1973-74 school year. It is reported for each secondary school and the entire school district. It should be noted that this does not provide an interpretation of the cumulative effect of the dropout conditions. Thus, it should not be confused with the "projected dropout rate" that is sometimes used. Source: Annual Report of Pupil Attendance and Related Information, CDE Form 2.

Number of Courses Offered: This is a count of courses offered in the Fall of 1974 by any school having any grades 7 through 12. Source: Fall Report from School Districts, CDE Form 4.

In comparing the number of courses offered by individual schools, it must be noted that courses can vary as follows:

1. Length of course in minutes per session.
2. Number of sessions per week.
3. Length of time the course is offered, such as for a quarter, semester, or entire school year.
4. Courses having only one or a few sections as compared to many sections. Thus the number of courses offered could be greatly inflated if there are many one-section courses for special purposes.

Pupil/Teacher Ratio: Fall 1974 membership divided by the full time equivalency of classroom teachers. Ratios are shown for each school, total district and the entire state. Sources: Fall Report from School Districts, CDE Form 20, Section III, and Certificated Personnel, CP-1 Forms.

The ratios shown for individual schools may be substantially in error because of one or more of the following factors:

1. Failure to report one or several teachers on the Certificated Personnel, CP-1 Forms. This would substantially affect a small school.

2. Teachers assigned to more than one school are not shown as part of the staff at the schools they service. In some instances this could cause no pupil/teacher ratios to be shown for an individual school.

3. As kindergartens sometimes have 1, 2, or 3 sections, the staffing for them varies appreciably and an individual school's ratio may be distorted significantly. This is particularly true in the case of a school that has kindergarten only. In this case, if they only have ½ day sessions, the pupil/teacher ratio shown will be double a normally computed ratio.

1973-74 Group Achievement Test Results: There is no uniform statewide testing program in Colorado; consequently, the tests administered by school districts during the 1973-74 school year and reported on the following pages varied from district to district and from school to school.

To report the quality of education in Colorado as prescribed by C.R.S. 123-1-13 using standardized achievement tests alone is not possible. The standardized tests fail to indicate common areas of achievement but, rather, distinguish among individuals on the basis of their differences in achievement. Reporting median scores for the groups of students further obscures individual achievement. Although standardized tests may give an indication of the accomplishments of an individual student, they are only one measure of the quality of education. The tests reported here describe only a portion of two subject areas and do not reflect the broad range of accomplishments that may have taken place during the total educational experience.

Following are definitions or explanations of the column headings for the achievement test results section:

Subject: The subject areas of reading and mathematics are reported. If schools or districts reported giving no tests or reported no scores, that information is recorded here.

Test: The test which was administered. The tests listed below are among those administered by the districts and schools within districts. The capital letter abbreviations are used in the report to indicate the test given.

I. Achievement Batteries:

CAT	California Achievement Test
COMP	Comprehensive Test of Basic Skills
CPT	Cooperative Primary Test
CTBS	California Test of Basic Skills
ESS	Essential High School Content Battery
EVPA	Every Pupil Achievement
ITBS	Iowa Test of Basic Skills
ITED	Iowa Test of Educational Development
MET	Metropolitan Achievement Tests
NEDT	National Educational Development Test
SCA	Cooperative School and College Ability
SHSP	SRA High School Placement
SRA	Science Research Associates National Development
STEP	Sequential Tests of Educational Progress
STAN	Stanford Achievement Test
TAP	Test of Academic Progress
WRAT	Wide Range Achievement Test

II. Single Subject Achievement Tests:

CRT	California Reading Test
DR	Diagnostic Reading
DORT	Doren Diagnostic Reading
GPRT	Gates Primary Reading Test
ISR	Iowa Silent Reading
LCD	Lyons Carnahan Developmental Reading
NRT	Nelson Reading Test
PRP	Primary Reading Profiles

III. Scholastic Aptitude Tests:

CTMM	California Test of Mental Maturity
DAT	Differential Aptitude Test
PSAT	Preliminary Scholastic Aptitude Test
SCAT	Scholastic Competence and Aptitude Test

Number of Pupils Tested: Number of pupils reported to have been tested in each subject area.

Grade Tested: Test results were requested for the top grade in each of the following grade groups: 1-3, 4-6, 7-9, 10-12; however, many districts did not administer tests to students in the top grades in each group and had to furnish data for other grades within the specified grade groups.

The grade tested was determined by translating the month the test was administered into a decimal equivalent as follows:

.0	September	.5	February
.1	October	.6	March
.2	November	.7	April
.3	December	.8	May
.4	January	.9	June

If the sixth grade reading test were administered in February, the grade tested was 6.5. If the test were administered in September, the grade tested was 6.0.

Obtained Score: Districts and schools were requested to report median grade equivalent, median percentile, or median stanine scores.

A grade equivalent indicates the grade level, in years and months, for which a given score was the average or middle score in the standardization sample. For example, a score of 25 with the grade equivalent of 4.6 means that, in the norm group, 25 was the average score of pupils in the sixth month of the fourth grade. The median grade equivalent is that score above and below which 50 percent of the grade equivalent scores for students tested in each school or district fell. The scores in this report are expressed as two digit numbers with a decimal, the number to the left of the decimal indicating the grade and the number to the right indicating the month.

A percentile rank indicates what percent of the pupils in the norm group got the same score or a lower score on the test. For example, if a score of 25 correct answers on a certain test for fourth graders has a percentile rank of 52, it means that 52 percent of the pupils in the norm group scored 25 or lower on the test. The median percentile score is that score above and below which 50 percent or one half of the percentile scores for the students tested in one school or district fell. These scores are reported as two-digit numbers with no decimals.

A stanine is a score on a nine-unit scale where a score of 5 describes average performance in relation to the norm group's performance. The highest stanine is 9; the lowest is 1. The median stanine score is that score above and below which 50 percent of the stanine scores for students tested in one school or district fell. Stanine scores are reported as decimals and have a lower case s after them to distinguish them from the grade equivalent scores.

Each district reports its test scores compared to a normative group. The norm group is a national sample of students. If the district's median score for sixth grade students in the third month of the school year were identical to the median score for the national sample of sixth graders tested in November, the district would report its median score at the 50th percentile, or 6.3 grade equivalent, or 5th stanine.

SECTION II

County: The county in which the administration offices of the district are located.

District: Legal and common names of the district.

Budget Year: January 1 - December 31

Average Daily Attendance Entitlement: The average daily attendance entitlement (defined as the sum of the daily attendance for a period of time divided by the actual number of days of school taught during that period of time) or ninety-six per cent (96%) of the average daily membership during a four-week period ending with the fourth Friday in October in the year immediately preceding the budget year.

Attendance Entitlement: The attendance entitlement is the average daily attendance entitlement (ADAE) of the district during the four-week counting period or periods of either the first or the second year next preceeding the budget year, whichever is the larger number.

Mill Levies

General Fund Mill Levy for State Equalization: Under provisions of the Public School Finance Act of 1973, the general fund mill levy is determined by dividing the Authorized Revenue Base by the sum of the local share (one mill times the district assessed valuation divided by district attendance entitlement) and the state share. Source: "Computation of Colorado State Equalization for 1974", "1975 Colorado State Equalization" -- Colorado Department of Education reports.

Additional Mill Levy: If a district petitioned the State School District Budget Review Board (SSDBRB) for an increase in its authorized revenue base and it was granted, the additional mill levy is computed by multiplying the increase in the authorized revenue base by the district attendance entitlement and dividing that product by the district assessed valuation. If a district is granted the authority to increase the authorized revenue base by a successful vote of the electorate the additional mill levy is computed in the same manner described in the previous paragraph. Source: CDE computations and included in County Commissioners' certifications of mill levies.

Total General Fund Mill Levy: 1973 source: 2nd Annual Report of the Colorado Tax Commission; 1974 source: 3rd Annual Report of the Colorado Tax Commission; 1975 source: County Commissioners' certification of mill levies.

Representative Bond Redemption Fund Mill Levy: Some school districts may have different bond redemption levies within the district. Only the bond redemption levy which applies to the greater portion of assessed valuation is shown.

Capital Reserve Fund Mill Levy: 1973 source: 2nd Annual Report of the Colorado Tax Commission; 1974 source: 3rd Annual Report of the Colorado Tax Commission; 1975 source: County Commissioners' certification of mill levies.

Assessed Valuation: 1973 source: 2nd Annual Report of the Colorado Tax Commission; 1974 source: 3rd Annual Report of the Colorado Tax Commission; 1975 source: County Commissioners' certification of mill levies.

Assessed Valuation per Attendance Entitlement: Assessed Valuation divided by larger of two years ADAE count or the AE count. Source: Computed by the Colorado Department of Education.

Local Property Tax: District assessed valuation times general fund mill levy. 1973 source: 2nd Annual Report of the Colorado Tax Commission; 1974 source: 3rd Annual Report of the Colorado Tax Commission; 1975 source: County Commissioners' certification of mill levies.

Local $ per Attendance Entitlement (AE): One mill times the district assessed valuation, then divided by attendance entitlement. Source: Computed by the Colorado Department of Education.

State Equalization: Source: Computed by the Colorado Department of Education.

State Equalization $ per Attendance Entitlement (AE): Total state equalization divided by the attendance entitlement (AE). Source: Computed by the Colorado Department of Education.

Authorized Revenue Base: 1975 Authorized Revenue base is determined by adding the 1974 property tax (assuming 100% collection) to 1974 state equalization and dividing that amount by the October, 1973 ADAE count. Then that figure is multiplied by a given percentate found in the Public School Finance Act of 1973. Source: Certification of Authorized Revenue Base for Colorado School Districts for 1974 budget year and the 1975 budget year. Computed by CDE, certified by State Board of Education.
